WHY CHOOSE HALOSIL?

Four reasons why our Halo Disinfection System can improve your facility hygiene.

BENEFITS OF HALOSIL NXT

WHOLE-ROOM EFFICACY

Dry-Fogged Hydrogen Peroxide reaches areas that ordinary disinfection processes miss.

EASE OF USE

Simple three-step process makes whole-room disinfection simpler than ever.

SAFER CHEMISTRY

Proprietary blend of H₂O₂ and Silver ions means that HaloMist has broader material compatibility than other H₂O₂ Disinfectants.

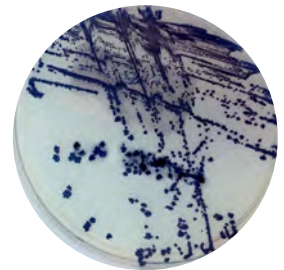

REDUCED COST

Reduce disinfection-associated labor, and reliance on older, more expensive fogging technologies.

LET'S TALK CHEMISTRY.

All HaloFogger® Models are designed to work with our HaloMist® surface disinfectant. HaloMist is an extremely effective blend of ionic silver and hydrogen peroxide that provides 6-log kills, even on spores like *C. Difficile*. A 6-log kill rate is the highest validated efficacy on the market today and represents a near-sterilization of the disinfected space.

HaloMist is even effective against hard-to-kill bacteria like *C. Diff*

Contact Us

We look forward to assisting you in achieving superior disinfection outcomes and ensuring a safer environment.
